

Account Manager | B2B Client & Portfolio Management | Data-Driven Business Growth
ricky.mjufriзал@gmail.com | +62819-2423-137 | linkedin.com/in/rickymj | github.com/rickymj

Account Manager with hands-on experience in B2B client relationship management, contract negotiation, and portfolio growth in the telecommunications and BPO industries, backed by over 4 years of combined professional experience across account management, data analytics, and process automation. Proven track record managing multi-billion rupiah client portfolios, consistently achieving 96–100% SLA and revenue targets through proactive account monitoring, risk mitigation, and cross-functional collaboration with operations, finance, legal, and commercial teams. Brings a strong analytical edge to account management, using Power BI dashboards, SQL, and process automation (UiPath, Power Automate) to turn client data into actionable business recommendations. Holds a Bachelor's Degree in Informatics Engineering, combining relationship-driven client management with a target-oriented, data-informed approach to driving business growth.

PT. Swakarya Insan Mandiri (SIMGROUP) – Jakarta

Jan 2025 – Present

- Analyzed revenue, SLA, workforce, and account-performance data for a portfolio of approximately 1,600 outsourced personnel and contracts valued at IDR 7–8 billion.
- Monitored departmental KPIs and strategic initiatives to evaluate business performance, identify operational risks, and recommend corrective actions.
- Maintained 96%–100% SLA achievement through performance monitoring, issue analysis, and risk-mitigation planning.
- Translated client operational challenges into data-driven business recommendations and service-improvement initiatives.
- Collaborated with operations, finance, legal, and commercial teams to ensure accurate reporting and successful implementation of client solutions.

Data Analyst & Billing Collection (Contract)

Jan 2021 - Dec 2024

- Extracted, cleaned, validated, and transformed approximately 3,000 work-order records per month using SQL and advanced Excel to support collection operations, capacity planning, and monthly target setting.
- Developed daily and monthly performance dashboards using Power BI and Excel to monitor collection achievement, agent productivity, incentives, and operational KPIs.
- Maintained 100% reporting accuracy by performing data validation, reconciliation, and quality checks before distributing reports to operational supervisors.
- Automated invoicing processes for approximately 1,000 work orders per month using UiPath and Power Automate, reducing manual processing time by more than 80%.
- Developed a Google Sheets-based WhatsApp notification tool to replace manual customer notification activities and improve collection process efficiency.
- Analyzed collection performance trends and operational variances to support supervisor decision-making and corrective action planning.

Administrator & Moderator (Part-Time)

Jan 2021 – Dec 2021

- Organized webinars and virtual events covering robotic process automation topics.
- Moderated technical discussions, coordinated speakers, and summarized key webinar insights for community members.

Admin Checker (Contract)

Sep 2021 - Dec 2021

- Entered shipment data into internal systems for courier distribution.
- Categorized and assigned approximately 1,000 packages based on courier delivery areas.
- Maintained accurate shipment records across multiple client systems.

Shop Manager (Contract)

Jan 2015 – Dec 2016

- Managed daily store operations, product availability, inventory reconciliation, and supplier replenishment.
- Recruited and coordinated minimarket staff to ensure continuity of operations.
- Analyzed monthly sales and inventory performance against an annual revenue target of IDR 2 billion.

Indonesian Journal Abstract Classification - *Python, Naive Bayes, Natural Language Processing, POS Tagging*

- Developed a machine learning model to classify Indonesian-language journal abstracts using the Naive Bayes algorithm and Indonesian POS Tagging features.
- Performed text preprocessing, feature extraction, model training, and performance evaluation using Python.
- Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix.
- Achieved an accuracy of 96% using a dataset containing 465 journal abstracts.

TPISurvey_BOT - Python, Telegram Bot API, Google Sheets API

- Developed a Telegram Bot to retrieve and present information from a database containing more than 40,000 records.
- Implemented query logic and Google Maps integration to support field-surveyor activities.
- Improved accessibility of survey information and reduced manual data-search activities.

CheckOrder_BOT - Python, Telegram Bot API, Google Sheets API

- Developed a Telegram Bot integrated with Google Sheets to provide updated order-tracking information.
- Automated order-status retrieval based on order numbers, eliminating repetitive manual checking activities.
- Reduced manual tracking workload by up to 100%.

Billing Collection Performance Analysis — *Python, Pandas, SQL, Power BI*

- Extracted, cleaned, validated, and transformed billing and collection data to ensure accuracy and consistency for analysis.
- Conducted exploratory data analysis to identify payment trends, collection patterns, customer segments, and factors affecting collection performance.
- Analyzed collection rate, payment status, outstanding balance, aging period, and customer response as key performance indicators.
- Segmented customers based on payment behavior and collection risk to support targeted collection strategies.
- Developed an interactive Power BI dashboard to monitor collection performance, high-risk customer segments, and operational trends.
- Presented data-driven recommendations to help the collection team prioritize customers and improve collection effectiveness.

Education

Telkom University, Bandung

Bachelor’s Degree in Informatics Engineering / Computer Science

Aug 2013 – Sep 2021

- Completed a thesis titled *"Abstract Classification Based on Indonesian Language Journals Using the Naive Bayes Method and Indonesian Pos Tagger Features"* developed individually using Python programming and Machine Learning.
- Awarded *Staff of The Month* in KOPMA organization for actively contributing to activities and setting an example for other team members.

Skills

Business & Account Management: Account Management, Client Relationship Management (CRM), Contract Negotiation, Portfolio & Revenue Growth, Business Development, KPI/SLA Monitoring, Stakeholder Management, Risk Management

Programming: Python, SQL, R

Libraries: Pandas, NumPy, scikit-learn

Data Science: Data Cleaning, EDA, Feature Engineering, Classification, Regression, Hypothesis Testing, Model Evaluation

Visualization: Power BI, Excel, PowerPoint

Automation: UiPath, Power Automate, Google Sheets, Telegram Bot API

Tools: Jupyter Notebook, Google Colab, Git, GitHub

Certifications

- Business Intelligence Analyst in the Professional Academy Program 2024
- PCAP: Programming Essentials in Python 2024
- Robotic Process Automation Professional Academy 2023
- 2nd Place Winner in QCC (Quality Control Circle) Batch 2 at SIMGROUP : Improving Client Survey Project Gross Margin Transportation Technology Indonesia, JABODETABEK Area from 20% to 22% in April 2025
- Special Recognition Award for QCC (Quality Control Circle) Batch 3 at SIMGROUP: Increased MSM BPO client revenue (Sales Job) from an average of IDR 700 million per month (September–November 2025 period) to IDR 2 billion per month in the April 2026
